Command:MO-Shifting Sands marks the entry of strategic game publisher CPM Inc. into the historical computer game category. Command:MO-Shifting Sands is the first game in this series and also available for Windows, Mac and Linux operating systems. Command:MO Shifting Sands is the first computer game written by Paul A. Bridge and currently serves as the "shifting sands" to his historical series, Command:MO Africa. This is the first historical game, featuring an operational scenario written by the author and is not a reskinned game like many of the "lite" and "educational" game series out there. You are the commander-in-chief of the "Israeli Defence Force" and a very, very busy man. During the day you deal with your own operational matters and at night you deal with enemy incursions; tactics, diplomacy and deception to achieve your aims. A key feature of the game is the ability to switch between day and night view and to react to events that happen in the day view as if they were happening at night. The game therefore becomes dynamic and reacts to the changing situation. Game Mechanics: The campaign is set in the Middle East during a time of crisis, from the aftermath of the Suez crisis, through the following conflict into the eve of the Yom Kippur War. There are 17 historical campaign scenarios plus three variations of the "Operational" scenario. Within the scenarios are several maps from all over the region. The scenarios are primarily "turn based" although there will be partial "real time" capability as well as a range of tactical options for the user to implement during their turn. These are: - Intercept and Counter-Air Operations - Changing the initiative of the campaign. - Defensive Fielding of SAM Systems - Some players will have the ability to defend their bases with SAM systems prior to turn start. - the Combatant Command Functions of Move, Fight, and Secure will also be available. The game mechanics consist of a number of process indicators and a combat matrix. - Players are issued their objectives and available resources at turn start. - All units start with an initial morale, which allows them to take part in combat. - Units can be Divided to use different formations. - The operation map provides all information in game as well as the location of friendly and enemy forces. - Air and Naval mission maps are also available. The aim of the game is to resolve all orders on your turn. All

"I was introduced to this game for free by a friend. The first chapter is free and is very well done. There are many different story paths available to you, like multiple endings, many choices and actions and unlocks. The game is very well made and I highly recommend it." 4.8/5 "This is a beautifully crafted RPG that, in spite of its size, manages to cover a vast variety of options for its players. I was pleasantly surprised to see it included on Kongregate. Good job!" 4/5 "How i like this game, its so unique. The freedom to choose your play style and way you play is so fun. Its also not at all grindy. Its a very short but solid and fun rpg. Its good for people who cant do long rpg's and they still enjoy a good rpg." 3.5/5 "I like this game. It's short, but there are so many choices to make in it and it's never monotonous. It's kind of like a life simulator. There's an ending, but it's still basically a game." 3.8/5 "I really liked this game, the choice system was very well done. I would suggest changing some of the words around though because some are hard to understand. Great game overall." 4.5/5 "Fantastic game! Has great music, graphics and story! Would have gotten 4.75 without the typos. Keep up the good work! This was such a short game but it had enough content to keep me engaged." 4.5/5 "Hmmm, when I bought this game, I thought it was going to be a story and base RPG, but it wasn't at all. Instead, I thought it was going to be an alternate history story... I don't know what it is now, though." 3.5/5 "This is actually pretty good. Yes, it's short, but the characters are quite well done, and the game is well-written and beautifully put together. If you like this kind of game, you'll love it. That's my advice to you, anyway." 4.5/5 "This is a pretty good game. It has a fair number of events to unlock, but I found that they are all worth doing. As for flaws, I

Lantern of Worlds is an action-adventure game, where you play as a prince or princess of a noble family. Your family, your land, your life - everything depends on your abilities. Do you have what it takes to become a hero? Set in the fantasy world of the Swan Palace, you will complete challenging tasks, fight against a wide variety of baddies, and learn the art of swordplay to become a hero and save the world. Guiding you is a quirky heroine, with her own unique way of taking care of matters. As you progress through the game, you will improve your skills and earn treasures along the way. Features: The game features original voiced dialogues and cinematics, with dynamic playable characters and unique storylines. A beautifully hand-drawn 2D game world. The 6 unique races each have their own heritage, culture, and strengths, and the game will teach you how to play as a hero. A comprehensive storyline with over 75 hours of gameplay. An immersive soundtrack. A feature-rich game manual with the game in and out. "The playing field is pretty level" This is the slightly hand-wringing review I promised earlier, but I'm going to start with a bit of a rant, because seriously, what is with all the crossover games, lately? Princess Maker: Lady Dawn isn't the first game like that, but it is the first one that I can think of that actually is worth my time. It is a cute little game that teaches you how to make cute kids (or how to make a companion pet, because if you can do one, you can do the other). Snatcher: I have a thing about maiming my heroes. It's just what I do. If I can't maim them, then I'll slice up their precious body parts until they stop moving, then steal their lovely face and griffin-like tail... then, I'll take a photo. Then, I'll frame it and put it on the wall of my lovely home, so that I can look at it, whilst eating tasty sweet treats, every day. Halo: Reach: Oh my god. I'm gonna write about this a little bit later on. It's the crossover that is almost completely worthwhile, and that I probably wouldn't have picked up if

[Injury by plant diterpenes in adults: clinical study of its frequency and evolution]. Injury by plants diterpenes is considered rare and its symptoms rarely evaluated. We found about 60 cases reviewed in literature, but the prognosis remains the same. The clinical entity is characterized by itching wheals without any local or biological sign. Most often the body sites affected are the feet, exclusively in women. Lesions are generally considered of innocuous clinical value, but the risk of injury by plants diterpenes must be kept in mind. The table on frequencies of incidents is given. Incidents are seldom reported in France; there is a need to correct the notions. Turkish, Arabic, and French school textbooks say the same thing to date. The texts say Islam is a "monotheistic" religion with the religion of Christianity as its oldest form of belief. The denial of the Talmud is in the spirit of the Turkish people. The backbone of Turkish youth is their love of history. We are anxious to learn the basic things that your people say on the screen of television, and we want to learn from them. This is why we demand to teach history. Are there any mentions of the
