A three-track album consisting of 24-bit stereo music recreations of the main titles of the game, inspired by the mood of original soundtrack creation process. Listen to the music and let yourself get wrapped up in the game-making atmosphere created by the game's design concepts: sound, music, and interactivity. 21-track version of the original soundtrack was released in 2009. Original soundtrack was used in music videos by dancer and choreographer Koms Kudurma, and the Estonian National Ballet during their performance in the international dance festival Tanz Der Dance. Music composed by Ville Virtanen (sound designer of the game), and sound effects by Juuso Paasela and Satu Huhtula. PreludeA unique study of the real world, where the lines between dreams and reality are blurred. Look into the world of old-fashioned folk tales and fairy-tales, where a deep, dark secret is revealed. A strange world of buried secrets, where the lines between dreams and reality are blurred. Look into the world of old-fashioned folk tales and fairy-tales, where a deep, dark secret is revealed. Experience the world of the nightmare in its modern-day. An old, yet untouched world, where the night and the day live side by side. Search for the wandering soul, which strives to find peace in the darkness, to restore light where there is none. Remains of a secret age, where the lines between dreams and reality are blurred. The world of dreams, where lies are believed to be truth. All that is hidden from the senses, feels like a real life. Go inside the world of the nightmares where the worlds of dreams and reality collide. The force of emotions and thoughts are like a machine, leaving nothing behind and only consuming. Video game sound designer Ville Virtanen designed the music for the game, influenced by the mood of the game and the Russian and Asian traditions that are the roots of epic fantasy epics. Each cutie-pucky of characters contains a deep, dark secret and desires and fears that only to be revealed in the night. The music is a haunting track built from multiple layers of instruments: from war drums to the gentle piano notes, and from the tap of a shaman's staff to the winds of the night. Use your skills and your intuition to uncover the hidden stories.

Game length: ~4.5 hours Platform: PC Genre: Point & click/puzzle Developed by: Rocinante Writer: Nathan Lovejoy What if, at this stage in your life, your only hope was to live a new life. As you look back on the past, consider yourself lucky to have found love and friendship, faced adversity with humor and grace. But can you really accept life as it is, when its time to start anew? Left at sea, you will face all the things you want to remember, the things you wished for and about life as a whole. Lost At Sea is a heart-pounding point and click game about life, memory and love. Set on a mysterious island, where every biome represents a phase of life, you will explore your surroundings and solve riddles to reclaim memories. By completing the puzzles, you will uncover new parts of the main character, Anna. While Anna builds her memories, uncovering the story of her life and her relationships. To help her on her journey, she will need to find different tools in the game, like a neon ocean, where she will search for objects in each biome, her memories. All the while her fears are chasing her, trying to trap her in her misery and prevent her from moving on. In the end, this is a game about the things you want to remember, the things you wish for and about life as a whole. Deep in a dark cave, you are exploring a cavern when you come upon a woman who is holding the key to the underworld. And she's not going anywhere until you hand over her treasure! Does she want your help, or are you going to be in danger? Don't forget your trusty sabre and your pack with a range of new weapons to help you on your quest! And you're in for a treat because upon completion of the task you'll receive a singularly unique treasure which can be used to win all the games in the game. So grab your torch, pick up your treasure, and go to work! It seems to be a simple mission, but it's not. It's her mission, and it is so much more than that. Once inside, she has the loot, the treasure and her life at stake. Stay far from the enemy, for they know you're in and will do anything

What's new:

Yum was a Yashovnik, recruited to be an ally of Knight Aldwin the Explorer. An allied of the explorer, Yum or "Yum" in the original edition, was a character who was part of Aldwin's team. However he was revealed to be a traitor to the Knight. He was one of the founding players of the Guild of Guild, hoping in time to lead them, but turned out to be a traitor who planned to take over from Knight Aldwin. Contents show]

Personality Yum was intelligent, very much like Knight Aldwin and a little bit of a playboy, while he was witty, he also was sarcastic and learned quickly. He was also knowledgeable about all sorts of cultures and history, as shown in the game's timesheets. Physical description Yum was a fairly athletic figure compared to a typical Knight. He was taller than most other Knights, and he had muscles. Yum had a calm, soft, and sweet personality. He had short red hair, and he was of average height. He wore a long coat of a deep gold color. He also had a white neck collar collar, a dark blue vest, and light blue pants. He wore a golden finger ring on his left ring finger, one of the symbols of his guild, the 'one who cares'. Combat During battle, Yum was a very strong and valiant leader, able to overthrow many beasts with the help of Aldwin, and use many kinds of weapons and skills during battle. He was also an excellent fighter, able to fight most beasts on his own. Aldwin even confessed to his own inferiority to Yum, saying he couldn't handle beasts on his own. This is because he didn't fight every beast because he wasn't an athlete. Yum himself didn't mind, and

claimed Knights weren't any better, just because they earned their position. He first appeared in the Chapter 5 of Aldwin's Hunt, where he and Aldwin met the Beast Zavagi and challenged him. Here, he used the Sleep Dart skill, to attempt to grab the beast. The skill was successful, and Zavagi was dragged to sleep. There was no other Beasts in the area, meaning Zavagi was the only one he was fighting, so he used a skill called "Handtohand Combat." This was a skill that allow him to go for hand to hand combat with enemy, while

Axis Football is a 3rd person American football simulation featuring realistic aimed passing, big hits, and massive customization. Axis Football is an open world American football simulation with a highly flexible and customizable gameplay experience. Each team has a unique set of attributes and the game can be driven by any combination of rules: Regular, Modified, or University. Modified serves as the middle-ground with a balance of college rules while still being fun. You can play the same game, but go to the local college and customize your team's attributes to be similar to the pro's. You can also customise every aspect of the UI, feel, sounds, announcers, uniforms, team names, logos, uniform designs, stadiums, cheerleaders, and more. Axis Football, ModNation Racers, and NBA 2K16 are developed by 38 Studios, former developer of the award-winning PC Game "Rise of Nations". Axis Football was made possible by a Kickstarter campaign in 2012. We are working on an iOS version of the game for release in 2015. About ModNation Racers: ModNation Racers is an off-road racing game developed by 38 Studios/Big Huge Games and published by Sony Pictures Home Entertainment. Each team in the game is owned by a different car manufacturer (Chevy, Dodge, Ford, Honda, Jeep, Mitsubishi, and Toyota) and you can customise your car the way you want. As the player you are able to perform basic stunts in-game, and you can customize your car with over 1000 parts and lots of paint colours! Rivals Road Trip is a game where you and your friends take control of your cars at a race around the famous and challenging Moto Circuit in a single player and multiplayer mode. By making the game a 3rd person racer we are able to do lots of things that we couldn't do with a top down racer like Rise of Nations. For example, we are able to give the player a full 360 view of their racing environment allowing us to explore the environment in-game and build lots of the tracks using real 3D mapping tech. Use it to your advantage or cover up your mistakes! Rivals Road Trip was developed by 38 Studios and published by Sony Pictures Entertainment. Rivals Road Trip is currently only available to purchase digitally on the PlayStation Network for \$19.99 USD. About NBA 2K16: NBA 2K16 takes cover of the upcoming NBA season and features all of your favorite NBA superstars
