The series' popularity is highlighted by a 70-million-dollar deal with AMC, NBC and BBC for a possible TV show and an entry into the TV show industry. The Walking Dead hit the TV screens in October 2014. The TV show's popularity has also been attracting players to the game. In 2014 alone, that year saw a strong growth in sales for The Walking Dead. Since the launch of the fifth episode of the TV series, the game saw a staggering sales jump in Europe. Over 6 million copies of the game have been sold, netting players £12 million in revenue. **By The Forces Of Magic! Fantasy Realm: A Land Torn Asunder By The Forces Of Magic!** (abbreviated to the more imaginatively titled **Fantasy Realm** and also known by its German title: **Das Land Der Zauber Real**), is a video game by Konami first released in Japan for the arcades on November 12, 1989, and then on the Super NES in 1992. It was the first Konami game to have music by Daisuke Achiwa, and involved eighty rooms which mixed platform and action game elements. The full title it got in Japan is literally translated: **Fantasy Realm: A Land Torn Asunder By The Forces Of Magic! Fantasy Realm: Vol.2: Another Adventure**. In the original version it was called **Fantasy Realm: The Land Of Magic** and, in the English version, it was called **Magic Realm: A Land Torn Asunder By the Forces of Magic!**. Gameplay In Fantasy Realm players control five playable characters, each of them equipped with a different item or item-combination. Characters differ in attributes, such as speed or strength. Some item-combinations, however, result in a character changing into a different type that possesses the same or similar attribute values but different moves or actions. The game is distributed in four volumes, each with eighty levels. Each stage has three objectives. To complete the first objective, the player must find all of the four colored balls in level 1, the second objective is to grab the five gold and the last is to get the exit. The four objective in the first volume is to find the three protective block symbols and enter the door. For the second volume, one has to solve the first and second objective of the first volume and so on, until the fourth volume, which contains all of the objectives from the first three volumes. In order to complete the first objective a player must first find all of the four colored balls in level 1, the second objective is to grab the five gold and the third is to get the exit. The four objective in the first volume is to find the three protective block symbols and enter the door. For the second volume, one has to solve the first and second objective of the first volume and so on, until the fourth volume, which contains all of the objectives from the first three volumes. Difficulty The difficulty of the game is greatly influenced by the amount of points that the player dies in the game and the amount of lives that the player has to start each level.
