ASUS AI Manager

Asus AI Manager is a freeware utility to manage your ASUS system files and data. It provides users with a means of managing files and data access. Includes security features that will enable users to protect private information and restrict access to the sensitive files with a password. Read more: News by Threat Type: ASUS AI Manager - Category:MalwareQ: Proper way to use a third party library in a symfony project I am developing a symfony application and I have to use the elasticsearchBundle. So I created an embeded server with the bootstrap.php which looks like this: public function getDependencies() { return [new \Elastica\Client(new \Elastica\Client\Builder() ->setHost(env('ELASTICSEARCH_HOST')), new \Elastica\Client\Serializer\XmlSerializer())]; } And I placed a conf/packages/elasticsearch.yaml file where I have configured the location of the jar files for elasticsearch. I have also configured the elasticsearch.yaml in my app/config.yml like this: elasticsearch: class: 'elastica.client.client' public: false # the server URL used to send requests to Elasticsearch # Warning: This setting must point to a server that the bin/elasticsearch server will be able to communicate with # set to '127.0.0.1:9200' to use the same server as the web server url: " But when I try to access the elasticsearch
