What's New in the?

Active@ Hard Disk Monitor is a software application which can be used in order to check the health and temperature of your

hard drive, and schedule a scan to determine bad sectors.

Seamless installation and easy-to-use environment The setup process is a piece of cake, as it does not offer to download any third-party products and it does not last longer than a few seconds. After you are done with it, you are brought to a pretty well-organized and clean interface which encompasses a menu bar, several buttons, a folder list of all connected drives and several tabs for a quick access to all available options. Check the HDD temperature and scan it for errors This program enables you to view, in real time, the

temperature of your hard drive, as well as a graphical representation of it for the current hour, the entire day, or a specific time in the past. In addition to that, it is possible to scan the disk in order to verify it for bad sectors. You can change block size (e.g. 512 bytes, 64 KB, 256 KB), process only particular sectors and choose a schedule on which this operation to take place. Collect data about the disk and save it to a file Basic information about you PC and HDD is available such as IP address, computer name, check periods, disk model, serial number, file system, number of cylinders,

user capacity and bytes per sector, while you also have access to S.M.A.R.T. data, including spin up time, raw read error rate, power-off retract count and power-on hours count. Last but not least, you can show temperature and status in the system tray, enable monitoring at Windows startup and save S.M.A.R.T. info to a custom location as a TXT file. Bottom line To conclude, Active@ Hard Disk Monitor is an efficient piece of software which lets you monitor the health and performance of your HDD. It does not consume a lot of resources when running and we did not detect any errors,

crashes or bugs in our tests.

The interface is dedicated to all user categories and all jobs are completed in a swiftly manner.

Description: Complete HPC (High Performance Computing) Solutions Suite delivers an all-in-one HPC solutions to address the complex challenges that the leading HPC users face in optimizing and troubleshooting their big data clusters, while accelerating research and enhancing productivity. Key features: Automated performance tuning and diagnosis with full recovery support (recovery of HPC solution performance back to initial state, recovery of HPC

solutions after system crashes,
recovery of HPC solutions to
original settings after updates,
and full recovery to factory
settings) Fully automated disk
migration for HPC users Migrate
your current/existing file
systems (root file systems and
data file systems) automatically
and automatically, thus saving
hours of your valuable time and

System Requirements:

Windows 10, Windows 8.1,
Windows 8, Windows 7,
Windows Vista, macOS 10.8 or
newer OS X 10.9 or newer 2 GB
RAM or more Recommended:
