It does one thing fairly well, and I'd say that it does that one thing better than most. If you are ready to purchase Lightroom and have heard that there is much to love in this new version, then read on. I'll list its main new features and include a few suggestions for people looking to upgrade to Lightroom 5.0 for the first time. Installing or upgrading to version 5.0 is fairly simple, but you'll need to have an internet connection and a copy of the Adobe Creative Cloud to do it. The first thing that you'll do is to download the latest release of Lightroom, and install the accompanying mobile application on your iPhone, iPad or Android device. Purchasing a copy of the Adobe Creative Cloud, for about USD 99.99, enables you to sync your images to the cloud, and your editorial changes to Lightroom to your desktop and mobile devices. Like I mentioned before, Lightroom 5.0 is a big upgrade. The "Welcome to Lightroom" dialog box has been replaced by a "What's New" feature buried in the left-hand menu, accessed by a new "Help" button at the bottom of the dialog box. This dark gray box offers a quick introduction to the new features, and links to each them so you can dig deeper, if you so desire. The documentation can be found on Adobe's website, and there are some great video tutorials on YouTube. The first thing you'll notice about Lightroom is that the functionality is achieved immediately.
