Conclusion of CloudJump Free 13 Mar, 2018 CloudJump Free is a handy tool that enables you to quickly create cross-platform cloud servers for public and private use. It can also be used to communicate with remote locations and shared files. This small utility can do a lot of work, including create and share files, convert pictures into GIFs, or transfer them to servers in a few clicks. No installation necessary CloudJump Free is a small-sized software application that you can use to create cloud servers for your own public or private use, regardless of whether it's a local PC or a remote machine. Since there is no installation pack involved, you can drop the program files in any part of the hard disk and just click the executable to launch CloudJump Free. There's also the possibility to store it on a removable flash drive, in order to directly launch it on any PC with minimum effort. Easily create and use cloud servers No complicated setup required CloudJump Free is available for Mac, Windows, and Linux operating systems. It's a small and lightweight application, which means that it doesn't consume much system resources. This means that it should be able to launch even on older hardware and older systems. It also provides you with the possibility to create cross-platform servers that will enable you to share files and media on public or private clouds, even if they're located remotely. CloudJump Free allows you to create and use cloud servers without any complicated setup. First of all, you have to specify the operating system you're going to use. Then, you have to select a folder where you're going to store the files, and choose how much you want to pay for the service. After entering the server address and payment data, you have to click the Create button to access the Free version of CloudJump Free, which can be used to upload and download files without the need for registration. Unfortunately, this software doesn't have any advanced settings, and it doesn't allow you to customize the server according to your requirements. CloudJump Free has a standard-looking window with a minimalistic structure. It's worth mentioning that CloudJump Free doesn't have a user interface, which makes the process

Zip Lock is a small-sized and portable software application that you can use to seamlessly lock and unlock files in just a few clicks by specifying a password. It offers a simple solution to help you prevent unauthorized PC users from viewing and editing your personal data. No installation necessary Since there is no installation pack involved, you can drop the program files in any part of the hard disk and just click the executable to launch Zip Lock. There's also the possibility to store it on a removable flash drive, in order to directly launch it on any PC with minimum effort. What's more, unlike most installers, it doesn't modify Windows registry settings. Straightforward interface and options Made from a standard-looking window with a minimalistic structure, the interface invites you to get started by entering a password, which must have anything between 5 and 256 characters. As soon as you enter at least five characters, Zip Lock displays a button that enables you to select the file you want to unlock using the file browser. Unfortunately, drag and drop is unsupported. Easily lock and unlock files with passwords The program automatically creates a locked version using the specified key without actually removing the original file, so make sure you don't leave it lying around on the computer unsecured. The new file is generated in the same location as the source. It has the same name as the original item (including its extension), the ZLB format, and no associated application for opening it. In order to unlock the file, you have to follow the same steps: after entering the correct password, simply select the ZLB file to unlock. Once again, Zip Lock doesn't delete the source, so the file is unlocked and generated alongside its ZLB counterpart. Evaluation and conclusion As expected, the utility locked and unlocked files very fast in our tests, during which it remained light on system resources usage. No error dialogs popped up, and it didn't hang or crash. However, it doesn't have any advanced settings available, nor does it offer support for locking and unlocking multiple files in bulk. We must also keep in mind that the tool hasn't been updated for a pretty long time. Otherwise, Zip Lock gets the job done and can be used with ease by anyone, including those with no previous experience in password protection software. Video Ads That's why we offer the best quality in HD and Full HD. Our easy-to-use Movie Maker is your top choice for creating great videos. It's fast and simple. No HTML or Flash experience needed.
