Gears Of War 3 Windows 7 Theme [Updated] 2022

So here is my submission for the contest. I had to try and make an awesome looking theme but with people in it, but I couldn't really do much with that, but I did manage to make a theme that is very close to what I really want. What do you guys think? #gears #otb #entertainment #adventure #game #gearsofwar #fps #epicgames Teaser: So here is my Windows 7 Theme. I've created a random blend of images, from different games, and I've added a few icons that are exclusive to Windows 7. I want to use it as a car window decal and a small logo in the corner. I've added a background song, but I don't know how to get it on there yet, but I'll work on it. I'm thinking it should read something like, "Get the Gears" or "Get the Gears 7". It would also make a good desktop wallpaper if you guys like it. But please do comment on it and tell me what you think. I want to know what's good and what's bad. I'm really into making themes and making my own videos. This is going to be the second one I've made and it's my first time using the Beta Windows 7 theme with my custom icons. So tell me what you think of my first attempt. And I'll see you all later.
