Category:Indian romantic comedy films Category:Indian comedy-drama films Category:Indian films Category:Telugu-language films Category:Indian remakes of American films Category:2010s Telugu-language filmsQ: How can I manipulate variables in a Django template? In a Django template, I'd like to have something like this: {% if change_vars.x > 0 %} stuff {% endif %} Where change_vars.x is some variable, and the standard django template syntax {% if blah %} is used. I tried doing something like {% with change_vars.x as x %} inside of my {% with %} tag, but it didn't work. I also tried using a lambda inside of the {% if %} statement, which did not work either. Any idea how I can do this? A: I believe this is called the With statement for the {% with %}. It is included in Django >= 1.6. If you need this functionality for Django stuff Q: VIM: Strip whitespace from lines between key words I am trying to write an abbreviation for moving to a specific line in a given file. For example, consider this file: abc def ghi If the only keyword that is searched for is def, the desired output is: def If the only keyword that is searched for is ghi, the desired output is: ghi In order to do this, I use the following abbreviations: g:w t# f988f36e3a
