While on the subject of lightroom, why stop at Photoshop? A few more awesome apps for your existing Lightroom library from author Spence Dennard, Brian Hess, and Dave Davis. These add-ons are available as free downloads from two websites: CreativeBoard.adobe.com , and Creative App . Both sites have descriptions and video tutorials for using the extensions. The CreativeBoard version will also allow the extensions to be shared among registered users. Let's take a look at a couple of photography apps that give you the freedom to instantly beautify and adjust images ranging from 10 to 80 megapixels in size. AP Free is an app that offers four different looks: Vacuum, Uranus, Wanda, and Wanna?v, for a total of four different transformations. All of the patterns are labeled step-by-step, allowing you to adjust or undo as needed. The app provides a sunlit exploration album that you can access once you set the image as the current wallpaper. You can also adjust settings as desired, including contrast, brightness, saturation, exposure, and more. Once you've taken a look around, use the "Save to Camera" command to upload the image for sharing as needed. Gigapan is an app that gives you the opportunity to explore historic and modern sites via aerial photos and 360-degree panoramas. You have access to the near 400,000 Gigapan imagery in the public domain that includes images by NASA, the US Department of Defense, and other collection agencies. Now that you've perused some of the site's articles, it's time to get started.
